SUBJECT OVERVIEW

> ./access_personnel_pro·le --subject HELENA

>> [SYS] At 19, I feel like a system still trying to define its own parameters. I used to think I understood myself, the quiet type who keeps everything internal and lets actions speak louder than words. But lately, I've realized that knowing how to move forward is not the same as knowing where you're going.

>> [LOG] Maybe uncertainty isn’t an error to be fixed. Maybe it’s part of the process of becoming.

>> [WARN] Anyway, enough existential debugging.

>> [USER] I'm Helena, a 19-year-old Computer Science student who aspires to become a researcher and developer. Right now, I'm exploring AI and frontend development while actively volunteering in the tech community.

>> [DATA] I may not have everything figured out yet, but at least I have data to work with.

[STATUS] Still learning. Still becoming. Still running.
