HELENA R. HERRERO

Navotas City, Philippines | helenaherrero515@gmail.com | +63 999 831 7338 | Github | LinkedIn

PROFESSIONAL SUMMARY

Versatile Computer Science student at PUP with hands-on experience in data science, machine learning engineering, and product management. Proven track record as a hackathon champion and scholarship manager, with internships spanning ML model development and end-to-end product roadmaps. Active contributor across AWS, GDG, and blockchain communities, with a multidisciplinary background spanning frontend development, UI/UX design, graphics, and creative media.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C
Frontend & Web: React, HTML/CSS; Chrome Extension development
Data & ML: Pandas, NumPy, Scikit-Learn, TensorFlow/Keras, PyTorch, SMOTE, SVM, Random Forest, XGBoost
Visualization & BI: Tableau, Power BI, Google Looker Studio
Blockchain: Solidity, Stellar
Design & Tools: Figma, Canva, Asana, Notion, Github
Others: UI/UX design, Agile project management

PROFESSIONAL EXPERIENCE

KADAKAREER | *Product Management Intern* *Remote*
Technologies Used: **Notion, Google System, Asana, Slack** Jan 2026 – Jun 2026

- Collaborated with design and engineering teams to deliver new website features on schedule; contributed to UX feedback loops and product roadmap decisions that shaped the end-user experience
- Managed cross-functional timelines in Asana and Notion, coordinating engineers, designers, and stakeholders; provided design-informed input on feature prioritization

FLYRANKAI | *Machine Learning Engineering Intern* *Remote*
Technologies Used: **Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Machine Learning** July 2026 - Sept 2026

- Built data visualizations and structured documentation to communicate model insights clearly to non-technical stakeholders, applying data storytelling and visual communication principles
- Developed and evaluated ML models for search intelligence and content optimization; contributed to technical presentations and a professional portfolio showcasing AI and research work

PROGREE | *Machine Learning Intern* *Remote*
Technologies Used: **Python, Scikit-Learn, TensorFlow/Keras, PyTorch, SMOTE, SVM, Random Forest, XGBoost** Aug 2026 - Sept 2026

- Built supervised machine learning pipelines using Python and Scikit-Learn, implementing preprocessing, feature scaling, imputation, categorical encoding, and regularized regression with R^2 and RMSE evaluation.
- Developed CNN image classification and imbalanced clinical disease prediction pipelines, applying data augmentation, SMOTE/class weighting, model tuning, and cross-validation using models including SVM, Random Forest, and XGBoost.

PROJECTS

GuidHer | Frontend Developer & UI/UX Designer *July 2026*
Developed the winning project for the **GDGPUP SPARKSFEST 2026 Hackathon**, where the team received the **Champion** title and **Social Impact Award @ WOCEE 2026**.

- Led UI/UX design and frontend development; conceived user flows, designed Figma prototypes, and implemented a polished, user-tested interface under a tight hackathon timeline.
- Delivered the final product presentation, clearly communicating design decisions, user flows, and interaction rationale to a panel of judges.

ConveX | *Frontend Developer & UI/UX Designer* *July 2026*
Built an OpenAI-powered application during the **OpenAI Build Week Community Buildathon 2026**, integrating GPT APIs into the product experience.

- Contributed to frontend architecture and designed UX flows for a seamless AI-powered user experience.
- Translated product requirements into intuitive interface designs and frontend components.

PurifAI | Frontend Developer & UI/UX Designer *May 2026*
Built **PurifAI**, an AI-powered cybersecurity platform developed for the **CODEKADA Hackathon 2026**, focused on protecting enterprise AI systems from prompt injection through real-time threat detection.

- Led frontend development of the React dashboard and Chrome extension, while also handling the overall UI/UX and visual design.
- Developed the project's visual branding and graphics, ensuring consistency across the interface and presentation materials.
- Edited the team's demo video and contributed to the final product presentation.

LINGAP | *UI/UX & Graphics Designer* *May 2026*
Co-developed **LINGAP**, a blockchain-based donation platform for the **Build on Stellar PH Hackathon 2026**, earning **6th Place** among participating teams.

- Owned the UI/UX design and visual assets, creating a transparent and trust-focused interface for milestone-based escrow and donor verification.
- Designed user flows and interface components to make blockchain-based donation tracking accessible and intuitive.

EXTRACURRICULARS

AWS Student Builder Group | Data Science and Analytics Co-Lead *September 2026*

- Formerly served as Senior Associate and DataCamp Scholarship Manager.
- Planned and facilitated quarterly online and onsite workshops, reaching over **300 student learners and attendees**.
- Received positive feedback from participants regarding teaching effectiveness, presentation delivery, and relevance of workshop topics.
- Managed over **200 DataCamp scholars** across various learning tracks, including Data Engineering, Data Science, Data Analytics, AI Engineering, and Software Development.

Microsoft Campus Club | Chief Partnership Officer & FrontEnd Developer *August 2026*

- Lead partnership initiatives and external relations to establish collaborations with student organizations, technology communities, and potential industry partners.
- Coordinate partnership proposals, sponsorship opportunities, and collaborative activities to support organizational events and programs.
- Contribute to frontend development projects by building responsive, accessible, and user-friendly web interfaces.
- Collaborate with technical, creative, and executive teams to align partnership objectives with organizational initiatives.

Seekers Guild | AIX/UI/UX Developer Lead *August 2026*

- Lead AI-related development and UI/UX design initiatives, focusing on intuitive, functional, and user-centered digital solutions.
- Guide team members in interface design, prototyping, and frontend implementation while maintaining consistency in design and usability.
- Collaborate with developers and designers to integrate AI-driven features into digital products and applications.
- Oversee design workflows, technical planning, and team coordination to support project development and delivery.

Microsoft Student Community Philippines | Executive Secretary *September 2026*

- Manage organizational documentation, meeting minutes, official correspondence, and administrative records.
- Coordinate meeting schedules, internal communications, and follow-up actions among executive officers and department representatives.
- Maintain organized databases, membership records, and shared documentation to improve administrative efficiency.
- Support organizational planning, event coordination, and implementation of initiatives across different departments.

AWS User Group Philippines | Creatives and Logistics Committee *January 2026*

- Supported the planning and execution of monthly community meetups, technical sessions, and networking events, engaging over 100 AWS enthusiasts and professionals each month.
- Assist in event logistics, including venue preparation, registration, attendee coordination, and on-site operations.
- Develop creative materials and visual assets to support event promotions, community engagement, and organizational branding.
- Collaborate with organizers, speakers, and fellow volunteers to ensure smooth event execution and a positive attendee experience.

VOLUNTEERING

AWS Community Day Philippines 2026 | Creatives Member *March 2026*

- Designed promotional and publication materials that generated over **10,000 engagements across social media platforms**.
- Collaborated with the creatives team to develop visually engaging content aligned with event branding and promotional objectives.

Philippine Blockchain Week | Social Media and Documentation Member *June 2026*

- Supported social media coverage and event documentation through photography, content creation, and real-time event updates.
- Collaborated with the media and documentation team to capture event highlights, speaker sessions, and community engagement activities.
- Assisted in organizing visual content and digital assets for post-event publications and promotional materials.

Echelon Philippines 2026 | Sandbox Logistics Member *August 2026*

- Assisted in coordinating sandbox operations, event logistics, and on-site preparations to ensure smooth execution of event activities.
- Supported attendee coordination, venue arrangements, and operational requirements while collaborating with event organizers and volunteers.

Build Over Night Overnight Hackathon 2026 | Creatives Member *August 2026*

- Developed promotional materials, digital assets, and event visuals to support hackathon marketing and participant engagement.
- Collaborated with organizers and fellow creatives to maintain consistent event branding across publication materials and digital platforms.

Packet Capture Networking X Security Capture the Flag Competition | Creatives Head *August 2026*

- Led and coordinated the creatives team in producing promotional materials, event branding, and digital assets for the cybersecurity competition.
- Collaborated with stakeholders, event organizers, and committee leads to align creative deliverables with event objectives, timelines, and branding requirements.
- Delegated design responsibilities, monitored progress, and reviewed creative outputs to ensure quality and timely delivery.

EDUCATION

Bachelor of Science in Computer Science *September 2025*
Polytechnic University of the Philippines
